Welcome

INISEG The International Institute of Studies on Global Security is promoted by Aucal Foundation as the only Spanish private center exclusively focused on security and defense areas of studies, offering official masters and a PhD degree in Law, Education and Development, with the support of the best national and international universities.

Studying at INISEG offers our students the excellence of one of the most recognized private institutions in Spain, with the best university professors, researchers and the most qualified professionals from the Security Forces of the State and its Military Forces.

In INISEG our students find a broad option of academic courses in security, criminology and crime forensics, cybersecurity, defense, terrorism and intelligence.

Solid partnerships with education institutions, universities and corporations, in addition to consistent dedication to research and to use the most innovative technologies, allow us to offer official university courses with the best standards of quality.

INVESTIGATION
OUR OBSERVATORIES

OCATRY
Observatorio Contra la Amenaza Terrorista y la Radicalización Yihadista

The Observatory on Terrorist Threats and Jihadist Radicalization was conceived thanks to the initiative of the International Institute of Studies on Global Security (INISEG) and pools different interests from many international research, official and private institutions to offer solutions to the threats regarding movements of radicalization and latent terrorism within our societies.

In a global liquid context combined with technological revolution, the porosity and resilience of our Western societies is always dealing with tension between the openness to the world and the need to maintain their local environment. In this complex scenario, hybrid threats represent the most innovative and challenging issue regarding International Security and Geopolitics.

The Observatory on Hybrid Threats is conceived to provide academic analysis, solutions and services related to this trending topic.

Intelligence
Colegio Universitario Europeo

European University College | Madrid - Roma

The creation of the **INTELLIGENCE European University College** responds to the conviction that this scientific area has already reached an optimal level of development to be considered as an independent structure within the university framework of courses, to provide University, Society and Corporations with the most specialized area of research, education and services' provision, due to the fact that in the current historical and political context, Intelligence and Security analysis has a very high significance to support both public and private decision-making processes.
